Málaga, Spain

Professional Summary

IT professional with over 3 years of experience in DevOps, developing and automating processes in cloud environments (AWS, Kubernetes, Docker) and implementing CI/CD pipelines. Previously held senior technical management positions in the industrial sector for over 11 years, bringing strong leadership, organizational, and project management skills, plus more than 6 years as an Industrial Inspector. A versatile, results-driven profile with the ability to adapt to dynamic and fast-changing environments.

Professional Experience

2022 – Present:

Whalar

<https://www.whalar.com/>

DevOps Engineer Junior → DevOps Engineer

- Developed Bash and Python scripts to automate recurring tasks.
- Built and optimized custom Docker images for multiple projects.
- Managed and deployed applications in Kubernetes: created Deployments, CronJobs, ConfigMaps, ServiceAccounts with IRSA, implemented S3 CSI volumes, configured Ingress rules, and deployed using Helm.
- Administered AWS services including RDS, S3, ECR, IAM, and EKS, optimizing access policies.
- Used HashiCorp Vault for secure secrets management and configured authentication via Kubernetes Auth.
- Implemented and fine-tuned Bitbucket Pipelines for EKS deployments.
- Audited and optimized Prometheus alerts, adjusted Alertmanager configurations, and created Grafana dashboards.
- Created and maintained Git repositories in Bitbucket, managing branches, permissions, and code reviews.
- Participated in key infrastructure projects including the corporate VPN, Alertmanager, and other critical services.

2016-2022:

Grupo ICA

<https://grupoica.eu/>

Industrial Inspector

- Performed inspections and issued technical reports in an Authorized Control Company for lifting and handling equipment, electrical installations, and industrial machinery.

2002-2013:

Grupo ORP

<https://www.grupoorp.es/>

Head of IT, Quality, Occupational Risk Prevention, Technical Office, and other technical roles

- Managed IT, Quality, Occupational Risk Prevention, Environment, Technical Office, and Data Protection & Information Security departments.
- Coordinated multidisciplinary teams and supervised worksites.
- Optimized technical and human resources to maximize efficiency.
- Managed suppliers, purchasing, and contract negotiations.
- Administered IT systems, servers, and networks.
